

## **Medicaid System Selection Checklist**

### **Key Features**

1. Direct Access to Direct & Indirect Sales data for calculating Medicaid Figures
2. Automatically creates Monthly & Quarterly EDI files for submission to CMS
3. Store and Track all relevant Medicaid Figures
4. Auto-Collect CPI figures for URA calculation
5. Collection and Validation of State Invoices
6. Hold and monitor Invoice Disputes
7. Calculate and Pay Medicaid Rebate to State
8. Direct connection to Finance system for timely payment
9. Automation provides timely Government compliance
10. Task Automation Logic prevents processing errors
11. Increased control of Payment Amounts to States
12. Reduction in submission errors from States
13. Increased User control over Medicaid changes

### **Integration**

1. Medicaid Payment system should have access to Direct & Indirect Sales Data for Processing
2. All incoming EDI must conform to ANSI standards using the latest formats and technology
3. All Sales Tracings should be loaded using automated routines
4. All relevant financial systems must be available for Medicaid Payment interface
5. Financial systems must be able to accommodate Medicaid adjustments based on retroactive sales changes
6. All State and End customer related data must be available to assist processing
7. Relevant Product profile data must be available to support accurate processing

### **Implementation Essentials**

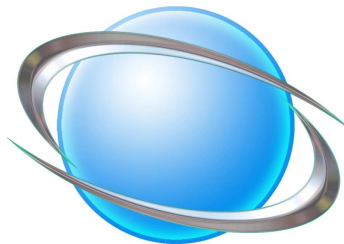

1. Hardware Configurations must be comparable to the estimated data volume to ensure timely processing
2. Database Setup and Configuration must be based on a projected growth of 5 years. Sales tracings transaction rates (per month) will be used to determine a configuration
3. Automated conversion routines should populate Medicaid system in preparation for testing and go-live
4. Advanced Data transfer technology must be used to ensure fast movement of data between all systems
5. Implementation should be complete within 1-3 months

### **Pricing**

1. Software provider should offer:
  - a. Subscription based pricing not requiring an upfront license fee if desired.
  - b. Pay as you go options
  - c. Flexible term lengths with auto renewal feature
2. The cost of implementation assistance should range from \$10,000 to \$100,000 depending upon size and scope of project.
